DEANS KNIGHT

INCOME CORPORATION

**ANNUAL MANAGEMENT REPORT
OF FUND PERFORMANCE FOR 2015**

This annual management report of fund performance (the "**Report**") contains financial highlights of Deans Knight Income Corporation (the "**Company**"). This Report should be read in conjunction with the financial statements of the Company for the year ending December 31, 2015 (the "**Financial Statements**"), which, if not included with this Report, can be obtained at your request, at no cost by emailing info@dkincomecorp.com, visiting our website at www.dkincomecorp.com for contact details or on SEDAR at www.sedar.com. Readers may also contact us to request a free copy of the Company's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

A NOTE ON FORWARD-LOOKING STATEMENTS

This Report contains certain forward-looking statements. In particular, this Report contains forward-looking statements in respect of the Company's investment strategy, the availability and use of the tax attributes of the Company, the resolution and disposition of the CRA Matter (as defined herein) including the extent of the Potential Tax Liability (as defined herein), and reflects the Company's expectations regarding the results of operations and performance of the Company and its investments. In some cases, forward-looking statements can be identified by terminology such as "may", "will", "should", "expect", "plan", "anticipate", "believe", "estimate", "predict", "potential", "continue" or the negative of these terms or other comparable terminology. Such forward-looking statements reflect the Company's current beliefs and are based on information currently available to the Company. With respect to such forward-looking statements, the Company has made assumptions regarding, among other things, the liquidity and potential proceeds to be realized from the Remaining Investments (as defined herein), currency, exchange and interest rates and concerning the disposition of the CRA Matter, assumptions based on the amount of time it has taken other companies to conclude similar matters in the past. A number of factors could cause actual events or results to differ materially from the results discussed in the forward-looking statements. In evaluating these statements, prospective investors should specifically consider various factors, including global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events and the risks outlined under "Risk Factors" in the AIF (as defined herein), which may cause actual results to differ materially from any forward-looking statement. Although the forward-looking statements contained in this Report are based upon what the Company believes to be reasonable assumptions, the Company cannot assure investors that actual results will be consistent with these forward-looking statements. Forward-looking statements are made as of the date of this Report and, other than as required by applicable law, the Company assumes no obligation to update or revise them to reflect new events or circumstances.

This Report also contains certain financial and operational information obtained from public sources in respect of certain companies included in the Company's investment portfolio. While management believes this data to be reliable, such information is subject to variations and may not be able to be verified due to limits on the availability and reliability of data inputs, the nature of the data gathering process and other limitations and uncertainties inherent in such information. Accordingly, the accuracy, currency and completeness of this information cannot be guaranteed. The Company has not independently verified any of the data from third party sources referred to in this Report or ascertained the underlying assumptions relied upon by such sources.

Investment Objectives and Strategies

The Company is a closed-end, non-redeemable investment company that, prior to April 30, 2014, was focused on investing in corporate debt securities. The Company's assets are managed by Deans Knight Capital Management Ltd. ("**Deans Knight**"), a respected British Columbia-based investment firm focused on managing high income and growth mandates for high net worth individuals, foundations, endowments and pension funds.

Since making a special cash distribution to shareholders of the Company ("**Cash Distribution**") on April 30, 2014, the Company has ceased all investing and portfolio activities, other than in connection with the Modified Business Objectives (as defined below). As such, the Company's business now consists of: (i) attending to and litigating the CRA Matter; (ii) divesting of the securities held in the Company's portfolio that were not liquidated prior to the Cash Distribution (the "**Remaining Investments**"); (iii) attending to any additional distributions to shareholders of any surplus cash and the eventual wind-up and termination of the Company thereafter; and (iv) attending to any ancillary matters related to any of the foregoing (collectively, the "**Modified Business Objectives**").

Risk

The overall risks of the Company are as described in the annual information form of the Company dated March 29, 2016 (the "**AIF**").

Prior to the reorganization and change in the Company's business that occurred in 2008, as discussed in Note 1 of the Financial Statements, the Company had generated significant tax losses and other tax attributes as a result of its prior business activities. In its tax filings since the reorganization, the Company has taken the position that these losses and other tax attributes could be used to offset taxable income generated by the Company, thereby reducing its taxes payable.

In July 2014, the Company received Notices of Reassessment ("**NORAs**") from the Canada Revenue Agency (the "**CRA**") for the taxation years 2009 to 2012, inclusive. In the NORAs, the CRA denied the use of the losses and other tax attributes by the Company on the basis that an acquisition of control of the Company occurred, as a result of the 2008 reorganization, and on the basis of the General Anti-Avoidance Rule in the *Income Tax Act* (Canada) (the "**CRA Matter**"). The Company, in consultation with its legal advisors, remains of the view that its tax filing position is appropriate, and intends to vigorously defend its position.

The NORAs indicate that the Company's tax liability for the 2009 to 2012 taxation years is approximately \$22.7 million or \$2.15 per share ("**Disputed Amount**"), including arrears interest and penalties. Given the Company's financial results for 2013, 2014 and 2015, the Company estimates its overall potential net tax liability ("**Potential Tax Liability**") for the years 2009 through 2015 inclusive to be, as of the date hereof, approximately \$21.5 million, or \$2.04 per common voting share and per common non-voting share (collectively, the "**Common Shares**"). The Company prepaid \$21.6 million to the CRA in 2014, which was equal to the Potential Tax Liability at that time, to limit any future interest from being incurred. The Company intends to reassess its Potential Tax Liability at regular intervals and prepay any additional amount, if necessary, to limit any future interest from being incurred.

Should the Company be successful in defending its tax filing position, the amount prepaid to the CRA will be refunded to the Company with interest. However, if the Company is unsuccessful, the recorded amount of the deferred tax assets, if any, as well as such amounts claimed to date would be recorded as a charge to income, and the Potential Tax Liability would be forfeited to the CRA.

In late 2014, the Company filed its Notice of Appeal to the Tax Court of Canada, appealing the NORAs and is now attending to normal pre-trial processes, including discovery of documents and examinations for discovery with the Crown. The Company anticipates that legal proceedings through the Tax Court of Canada to resolve the CRA Matter will take considerable time.

The Company's common voting shares ("**Voting Shares**") were delisted from trading on the Toronto Stock Exchange on April 15, 2014 and are no longer traded in a public market. The non-voting common shares of the Company ("**Non-Voting Shares**") are also not traded in a public market. As a result, there is no active market through which the Common Shares may be traded and there is also no guarantee that an active trading market will develop. The lack of a market for the Common Shares may affect the price of the shares in any secondary market that may develop; however, there can be no assurance that an active trading market or secondary market will develop, or if developed, that such a market will be sustained at the price level of the net asset value per share.

Given the majority of the Company's business is now limited to attending to the CRA Matter, the resolution and disposition of this matter which is uncertain at this time, an investment in the Company may be considered to be speculative. Therefore, an investment in the Company is only suitable for investors who are looking for potential capital appreciation and are willing to tolerate potentially significant volatility in the value of their investment.

Results of Operations

The net assets of the Company consisted of the following components for the periods indicated:

	December 31, 2015		
	\$	Per Common Share ⁽¹⁾	%
Remaining Investments ⁽²⁾	282,020	0.03	1.2
Cash and short-term deposits	1,924,070	0.18	8.1
Accrued income	-	-	-
Prepaid tax asset ⁽³⁾	21,662,136	2.06	91.4
Accrued liabilities less prepaid assets	<u>(154,979)</u>	<u>(0.02)</u>	<u>(0.7)</u>
	<u>23,713,247</u>	<u>2.25</u>	<u>100.0</u>

(1) Based on 10,537,263 Common Shares, including 10,191,592 Voting Shares and 345,671 Non-Voting Shares, as outlined in the notes to the Financial Statements.

(2) The details of the Remaining Investments are outlined in the Summary of Investment Portfolio below.

(3) Details of the prepaid tax asset are outlined in the Risk section above. Further, refer to the Note 6 - Taxation in the Financial Statements for more detail.

December 31, 2014

	\$	Per Common Share ⁽¹⁾	%
Remaining Investments ⁽²⁾	3,266,854	0.31	12.4
Cash and short-term deposits	1,399,985	0.13	5.3
Accrued income	155,666	0.01	0.6
Prepaid tax asset ⁽³⁾	21,606,636	2.05	81.9
Accrued liabilities less prepaid assets	<u>(54,597)</u>	<u>0.00</u>	<u>(0.2)</u>
	<u>26,374,544</u>	<u>2.50</u>	<u>100.0</u>

- (1) Based on 10,537,263 Common Shares, including 10,191,592 Voting Shares and 345,671 Non-Voting Shares, as outlined in the notes to the Financial Statements.
- (2) The details of the Remaining Investments are outlined in the Summary of Investment Portfolio below.
- (3) Details of the prepaid tax asset are outlined in the Risk section above. Further, refer to the Taxation note in the Financial Statements for more detail.

The majority of the decrease in the net asset value of the Company at December 31, 2015, compared to December 31, 2014, is due to the dividend of \$0.20 or \$2,107,452, declared in October 2015 and the decrease in value of the common shares of Mirabela Nickel Limited ("**Mirabela**") and the decrease in the value of Skylink Aviation Inc. ("**Skylink**") loan receivable. In addition, cash and short-term deposits have increased by approximately \$0.5 million, primarily as a result of the liquidation of the BlackBridge Space Holdings Ltd. ("**BlackBridge**") royalty stream and partial debt repayment by Skylink of the debtor-in-possession financing.

The Company's comprehensive loss for the year ended to December 31, 2015 was approximately \$0.554 million (\$0.05 per Common Share) versus \$0.2 million (\$0.02 per Common Share) for the year ended December 31. In 2015, investment income included royalty income from BlackBridge and interest earned by the Company on its investments in Skylink. In 2015, the Company generated realized capital gains of \$2.3 million, mainly due to the liquidation of the BlackBridge royalty stream in September 2015, and unrealized capital losses of \$2.6 million, primarily due to depreciation in value of the common shares of Mirabela and Skylink. The liquidation of the BlackBridge royalty stream generated \$2,186,304, or \$0.21 per Common Share. The Company distributed the proceeds from the sale of the BlackBridge royalty stream to holders of Common Shares via a cash dividend of \$0.20 per Common Share on October 15, 2015.

Recent Developments

Going forward, because of the partial repayment of the debtor-in-possession financing loaned by the Company to Skylink and the liquidation of the BlackBridge royalty stream, the Company's investment income is expected to be minimal.

See also the section titled "Risk" in this Report for recent developments regarding the CRA Matter and a description of the Modified Business Objectives.

There were no changes to the members of the Company's independent review committee during the year ending December 31, 2015.

Related Party Transactions

The Officers and Directors of the Company are also employees of Deans Knight, the Company's investment advisor and manager. These Officers and Directors are not paid by the Company. Deans Knight provides administration, financial reporting and other ancillary services required by a public company, as well as investment management services related to the Remaining Investments, all as more particularly set forth in the Services Agreement between the Company and Deans Knight dated May 20, 2014 and available for review on SEDAR at www.sedar.com. Deans Knight is paid a nominal fee of \$10 per month plus G.S.T. for the services it provides to the Company under the Services Agreement. Prior to May 20, 2014, and for the period January 1, 2014 to April 30, 2014, Deans Knight was paid a management fee computed quarterly, at an annual rate of 1.5% of the net asset value plus applicable taxes, and adjusted for certain non-investment related assets.

For the year period ended December 31, 2015, management fees totaled \$126 (2014 - \$554,785). At December 31, 2015, \$189 (December 31, 2014 - \$63) was owed to Deans Knight, which was unsecured and included in accounts payable and accrued liabilities in the statement of financial position, and is payable immediately.

Financial Highlights

The following tables show selected key financial information about the Company and are intended to help you understand the Company's financial performance for the past 5 years.

The Company's Net Assets per Common Share ⁽¹⁾

	Year ended December 31,				
	2015	2014	2013	2012	2011
	\$	\$	\$	\$	\$
Net assets, beginning of period	2.50	12.37	13.58	13.43	13.60
Increase (decrease) from operations:					
Total revenue	0.01	0.14	0.96	1.10	1.10
Total expenses	(0.04)	(0.09)	(0.29)	(0.26)	(0.26)
Realized gains (losses)	0.22	(0.37)	(0.50)	0.44	0.36
Unrealized gains (losses)	(0.24)	0.32	(0.47)	(0.19)	(0.52)
Future income taxes	-	(0.02)	(0.21)	(0.24)	(0.15)
Total (decrease) increase from operations⁽²⁾	(0.05)	(0.02)	(0.51)	0.85	0.53
Distributions:					
Return of capital ⁽²⁾⁽³⁾	-	(9.75)	-	-	-
Dividends ⁽²⁾⁽³⁾	(0.20)	(0.10)	(0.70)	(0.70)	(0.70)
Net assets, end of period	2.25	2.50	12.37	13.58	13.43

- (1) The information is derived from the Company's audited annual financial statements. Common Shares outstanding are 10,537,263, including 10,191,592 Voting Shares and 345,671 Non-Voting Shares.
- (2) Net assets, return of capital and dividends are based on the actual number of Common Shares outstanding at the relevant time. The increase / (decrease) from operations is based on the weighted average number of Common Shares outstanding over the period.
- (3) Return of capital and dividends were paid in cash.

Ratios and Supplemental Data ⁽¹⁾

Year ended December 31,

	2015	2014	2013	2012	2011
Net asset value (000's)	\$23,713	\$26,375	\$130,367	\$143,065	\$142,178
Number of common shares outstanding (000's)	10,537	10,537	10,537	10,537	10,537
Management expense ratio ⁽²⁾	1.53%	1.09%	2.21%	1.96%	1.90%
Portfolio turnover rate ⁽³⁾	0.00%	0.20%	25.23%	14.79%	79.90%
Trading expense ratio ⁽⁴⁾	0.00%	0.03%	0.03%	0.01%	0.00%
Net asset value per Common Share	\$2.25	\$2.50	\$12.37	\$13.58	\$13.49
Closing market price – Common Share ⁽⁵⁾	n/a ⁽⁵⁾	n/a ⁽⁵⁾	\$10.01	\$12.69	\$11.84

(1) This information is provided as at December 31 of the years shown.

(2) Management expense ratio is based on total expenses for the period and is expressed as a percentage of weekly average net asset values over the period. See "Related Party Transactions" and "Management Fees" in this Report for a description of and structure of the nominal monthly fee to be paid to Deans Knight under the Services Agreement which was amended on May 20, 2014. As a result of the amendment to the Services Agreement, Deans Knight is paid a fee of \$10.00 per month and is entitled to be reimbursed for any expenses incurred by it on behalf of the Company.

(3) The Company's portfolio turnover rate indicates how actively the Company manages its portfolio investments. It is calculated as a ratio of investments purchased or sold over the average value of the portfolio securities. A portfolio turnover rate of 100% is equivalent to the Company buying and selling all of the securities in its portfolio once in the course of the year. The higher a portfolio turnover-rate in a year, the greater the trading costs payable by the Company in the year. There is not necessarily a relationship between a high turnover rate and the performance of the investment portfolio.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year. This trading expense is insignificant, as the purchasing and selling of bonds do not generally attract a commission from the buying or selling party.

(5) On April 15, 2014, the Voting Shares were delisted from trading on the Toronto Stock Exchange. As a result, the Company's Voting Shares are no longer traded on a public market. Additionally, the Non-Voting Shares are not traded on a public market. As a result, a closing market price is not available for either the Voting Shares or Non-Voting Shares.

Management Fees

Deans Knight provides administration, financial reporting and other ancillary services required by a publicly listed company, as well as investment management services related to the Remaining Investments, all as more particularly set forth in the Services Agreement between the Company and Deans Knight dated May 20, 2014 and available for review on SEDAR at www.sedar.com. Deans Knight is paid a nominal fee of \$10 per month for the services it provides to the Company under the Services Agreement. Prior to May 20, 2014, and for the period January 1, 2014 to April 30, 2014, Deans Knight was paid a management fee computed quarterly, at an annual rate of 1.5% of the net asset value plus applicable taxes, and adjusted for certain non-investment related assets.

Past Performance

This section shows the Company's past performance, since it began operating its business as an investment fund. The past performance information includes changes in net asset value and assumes the reinvestment of all dividends paid to holders of Common Shares. The performance information presented is after the deduction of performance fees and expenses paid or payable by the Company to Deans Knight, its investment fund advisor and manager. It is also important to note that the past performance will not necessarily indicate what performance in the future will be.

Following the completion of the Cash Distribution on April 30, 2014, the Company's investment portfolio is comprised solely of the Remaining Investments. Additionally, the Voting Shares were delisted from the Toronto Stock Exchange on April 15, 2014. As a result of these significant

changes, it is anticipated that the future performance of the Company will not be reflective of or comparable to the past performance of the Company.

Year-by-year Returns

The accompanying bar chart shows the Company's performance for the years shown and illustrates how the Company's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made from when the Company began its operation as an investment fund on March 17, 2009 to December 31, 2009, and how much an investment made for the years ending December 31, 2010 through to 2015. Given the Company has ceased all investing activities, other than liquidating the Remaining Investments, the returns provided below for the year ended December 31, 2015 of -1.56% and for the year ended December 31, 2014 of -0.13%, are not necessarily indicative of what the returns would have been for the periods if the Company had continued to actively manage the investment portfolio.

† March 17, 2009 (Inception) to Dec. 31, 2009

Annual Compound Returns

The table shows the annual compound total returns for each of the periods shown ended December 31, 2015. The returns are compared against the BofA Merrill Lynch Canadian⁽¹⁾ and US⁽²⁾ High Yield Indices (“Indices”). As the criteria for determining the constituents of the Company's investment portfolio and the Indices differ, it is not expected that the Company's performance will mirror that of the Indices. Further, the returns of the Indices are calculated without the deduction of management fees and fund expenses whereas the performance of the Company is calculated after deducting fees and expenses.

	1 Year	3 Years	5 Years	Since Inception
Deans Knight Income Corp	-1.4%	-2.7%	1.9%	9.5%
ML CDN High Yield	-10.4%	-1.2%	2.8%	10.1%
ML USD High Yield	-4.6%	1.6%	4.8%	12.7%

- 1) **The BofA Merrill Lynch High Yield Canadian Issuers Index (HWC0)** tracks the performance of USD and CAD denominated below investment grade corporate debt publicly issued by Canadian issuers in the Canadian or US domestic markets.
- 2) **The BofA Merrill Lynch US High Yield Index (H0A0)** tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market.

Summary of Investment Portfolio

The following is a summary of the Company's investment portfolio as at December 31, 2015. This is a summary only and will change as the Company divests the Remaining Investments. A quarterly update is available at www.dkincomecorp.com.

March 30, 2016

Independent Auditor's Report

To the Shareholders of Deans Knight Income Corporation

We have audited the accompanying financial statements of Deans Knight Income Corporation, which comprise the statements of financial position as at December 31, 2015 and December 31, 2014 and the statements of comprehensive loss, changes in equity and cash flows for the years then ended, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

1 Nature of operations and going concern

Deans Knight Income Corporation (the "Company") is a corporation continued under the laws of Canada on April 11, 2001. The Company is a public closed-end, non-redeemable investment company, which prior to April 15, 2014 was listed on the Toronto Stock Exchange. The address of the Company's registered office, and its principal place of business, is 1500 – 999 West Hastings Street, Vancouver, British Columbia.

In April 2014, the Company's shareholders voted in favour of the special resolution authorizing: (i) an extension of the termination date of the Company until such time as reasonably practicable following the conclusion of the Canada Revenue Agency ("CRA") tax matter (note 6); and (ii) the removal of the restrictions on business that the Company can carry on. Going forward, the Company's business will comprise (i) divesting of any remaining investments held; (ii) attending to, and if necessary, litigating, the CRA audit and related tax appeal (note 6); and (iii) attending to any distributions to shareholders of surplus cash and the eventual wind-up and termination of the Company thereafter.

Prior to April 30, 2014, the Company's investment objectives were to: (i) maximize the total return for shareholders, consisting of dividend income and capital appreciation; and (ii) provide shareholders with monthly dividends targeted to pay out a minimum of 75% of net investment income annually. The Company did this through investing primarily in corporate debt rated BBB or below by recognized credit rating organizations. Prior to its reorganization in May 2008, the Company was a life sciences company involved in the research, development and commercialization of innovative products for the prevention and treatment of life-threatening diseases.

As per the Company's Articles of Incorporation, the common shares of the Company are to be redeemed at such time as is reasonably practicable following the resolution of the CRA tax audit and related tax appeal (note 6), or such other date as the Company deems appropriate, on not less than 30 days notice to shareholders. The common shares are presented as equity because they meet the criteria in paragraphs 16C – D of International Accounting Standard ("IAS") 32 '*Financial instruments: presentation*' for such classification.

The Company does not anticipate that there will be a resolution to the CRA tax dispute in the next 12 months, and accordingly is not anticipating winding up in that period. Therefore, these financial statements have been prepared on a going concern basis. If a resolution to the CRA tax dispute is achieved, or the Company deems it appropriate to wind up, then the Company would settle all outstanding liabilities, including obtaining a tax clearance certificate, and redeem the common shares of the Company.

2 Summary of significant accounting policies

The following is a summary of significant accounting policies followed by the Company.

Basis of preparation

These financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS").

These financial statements were authorized for issue by the Board of Directors on March 29, 2016.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Financial instruments

a) Classification

The Company classifies its investments in debt and equity securities, and derivatives, as financial assets or financial liabilities at fair value through profit or loss ("FVTPL"). All other financial assets and liabilities are measured at amortized cost.

The FVTPL category has two sub-categories: financial assets or financial liabilities held for trading; and those designated at FVTPL at inception.

(i) Financial assets and liabilities held for trading

A financial asset or financial liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorized as held for trading. The Company does not classify any derivatives as hedges in a hedging relationship.

(ii) Financial assets and liabilities designated at FVTPL at inception

Financial assets and financial liabilities designated at FVTPL at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated, on a fair value basis in accordance with the Company's documented investment strategy. The Company evaluates the information about these financial assets and liabilities on a fair value basis together with other related financial information.

Unlisted or non-exchange traded investments, or investments where a last bid, sale or close price is unavailable, or investments for which market quotations are, in the Company's opinion, inaccurate, unreliable, or not reflective of all available material information, are valued at their fair value as determined by the Company using appropriate and accepted industry valuation techniques including valuation models. The fair value determined using valuation models requires the use of inputs and assumptions based on observable market data including volatility and other applicable rates or prices. In certain circumstances, the fair value may be determined using valuation techniques that are not supported by observable market data.

The resulting values for investments not traded in an active market may differ from values that would be determined had a ready market existed, and the difference could be significant.

(b) Recognition, de-recognition and measurement

Regular way purchases and sales of investments are recognized on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets are de-recognized when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Financial assets and financial liabilities at FVTPL are initially recognized at fair value. Transaction costs are expensed as incurred. Subsequent to initial recognition, all financial assets and financial liabilities at FVTPL are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at FVTPL' category are included in the statements of comprehensive loss in the period in which they arise.

Under the amortized cost method, financial assets and liabilities reflect the amount required to be received or paid, discounted, when appropriate, at the contract's effective interest rate. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

At each reporting date, the Company assesses whether there is objective evidence that a financial asset at amortized cost is impaired. If such evidence exists, the Company recognizes an impairment loss as the difference between the amortized cost of the financial asset and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. Impairment losses on financial assets at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized.

The interest for distribution purposes shown on the statements of comprehensive loss represents the coupon interest received by the Company accounted for on an accrual basis. The Company does not amortize premiums paid or discounts received on the purchase of fixed income securities except for zero coupon bonds, which are amortized on a straight-line basis.

Realized gain/loss on sale of investments and unrealized appreciation/depreciation in investments are determined on an average cost basis. Average cost does not include amortization of premiums or discounts on fixed income securities with the exception of zero coupon bonds. Royalty income is recognized on an accrual basis as earned. Dividend income is recognized at the ex-dividend date.

Transaction costs are any costs that can be directly attributable to the acquisition and disposal of an investment, which include fees and commissions paid to agents, advisors, brokers and dealers; levies by regulatory agencies and securities exchanges; and transfer taxes and duties.

(c) Presentation

Financial assets and liabilities are offset and the net amount reported in the statements of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. In the normal course of business, the Company may enter into master netting arrangements or similar agreements that do not meet the criteria for offsetting in the statements of financial position, but still allow for the related amounts to be offset in certain circumstances, such as bankruptcy or termination of the contracts. The Company has not offset any material financial instruments as at December 31, 2015 or December 31, 2014.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair values of financial assets and liabilities traded in active markets (such as publicly traded derivatives and marketable securities) are based on quoted market prices at the close of trading on the reporting date. The Company uses the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, management determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. The Company's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and others commonly used by market participants and which make the maximum use of observable inputs. In certain circumstances, the fair value may be determined using valuation techniques that are not supported by observable market data.

The resulting values for investments not traded in an active market may differ from values that would be determined had a ready market existed, and the difference could be significant.

Specifically, financial assets and liabilities that are classified as held for trading are recorded at fair values determined as follows:

Foreign currency contracts

Foreign currency contracts (note 7) entered into by the Company are valued at an amount that is equal to the gain or loss that would be realized if the position were transferred, which is equivalent to the difference between the deliverable asset and the value of the asset to be received.

Financial assets and liabilities that are designated at FVTPL at inception are recorded at fair values determined as follows:

Equities

Publicly traded equities are recorded at closing prices as quoted on recognized stock exchanges.

The amounts at which the Company's publicly traded investments could be disposed of currently may differ from the carrying value based on market quotes, as the value at which significant ownership positions are sold is often different than the quoted market price due to a variety of factors such as premiums paid for large blocks or discounts due to illiquidity.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Fixed income investments and convertible debentures

Fixed income investments traded on a public securities exchange or traded on an over-the-counter market are valued at the closing price. Where no closing price is available, the last sale price is used where, in management's opinion, this provides the best estimate of fair value.

Fixed income investments not traded on a public securities exchange or over-the-counter market are valued by considering data inputs such as the last price the security was traded at, most recent bid/ask information, prices of similar securities with available prices, and comparison of yields of comparable investments.

Royalties

Royalty investments are measured on a discounted cash flow basis, where the value is imputed through forecasting cash flows using an appropriate discount rate.

Cash and cash equivalents

Cash and cash equivalents represent cash and short-term deposits with original maturities of less than 90 days held with a Tier 1 Canadian financial institution.

Foreign exchange

Assets and liabilities denominated in foreign currencies are translated into Canadian dollars, which is also the Company's functional and presentation currency, at the exchange rate applicable on the valuation date. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates that transactions occur. Foreign currency assets and liabilities denominated in a foreign currency are translated into the functional currency using the exchange rate prevailing at the measurement date. Foreign exchange gains and losses relating to cash are presented as 'Foreign exchange gain (loss) on cash' and those relating to other financial assets and liabilities are presented within 'Net realized gain (loss)' and 'Change in unrealized appreciation (depreciation)' in the statements of comprehensive loss.

Income taxes

The Company follows the balance sheet liability method of accounting for income taxes. Future income tax assets and liabilities are measured using rates expected to apply to the taxable income in the years in which the temporary differences are expected to be settled. The Company accounts for uncertain tax positions using the contingent liability model, whereby a provision is established only where it is probable that a payment will be required to be made.

Management has estimated the income tax provision and future income tax balances taking into account its expectation of deferred taxable income and an interpretation of the various income tax laws and regulations. It is possible, due to the complexity inherent in estimating income taxes, that the tax provision and deferred tax balances could change (note 6 and note 9), and the change could be significant.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Current income taxes are the expected taxes payable on the taxable income for the year using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustments to tax payable in respect of previous years.

Net assets per common share

The net assets per common share are computed by dividing the net assets of the Company by the total number of common shares outstanding on the statements of financial position.

Comprehensive loss per weighted average common share

Comprehensive loss per weighted average common share represents the comprehensive loss divided by the weighted average number of common shares outstanding during the year.

The weighted average number of shares outstanding during the year ended December 31, 2015 was 10,537,263 (2014 - 10,537,263). This weighted average includes both the voting common shares and non-voting common shares of the Company.

3 Capital stock

The Company is authorized to issue an unlimited number of voting common shares without par value and an unlimited number of non-voting common shares without par value. The holders of the voting common shares have one vote for each share held. The holders of non-voting common shares have no such right to vote.

The holders of both the voting common shares and the non-voting common shares are entitled to receive dividends, which must be declared and paid in an equal amount per share and at the same time without preference or distinction.

In the event of the liquidation, dissolution or winding-up of the Company whether voluntary or involuntary, or any other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs, the holders of the voting common shares and the holders of the non-voting common shares rank equally and are entitled to share and receive the remaining property of the Company.

There were no changes in the number of voting and non-voting common shares during the years ended December 31, 2015 and 2014. The total shares outstanding at December 31, 2015 and December 31, 2014 are summarized as follows:

	Number of shares
Voting common shares	10,191,592
Non-voting common shares	345,671
Total common shares outstanding	<u>10,537,263</u>

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

On April 30, 2014, the Company paid a return of capital to shareholders of \$102,738,314. This was accounted for by first reducing retained earnings, and then reducing common shares by the residual amount. As a result, retained earnings decreased by \$21,096,074, the carrying amount of voting common shares was reduced by \$79,100,874 and the carrying amount of non-voting common shares was reduced by \$2,541,366.

There was no return of capital to shareholders in the year ended December 31, 2015.

Contributed surplus

The contributed surplus balance did not change during the years ended December 31, 2015 and 2014. The balance at December 31, 2015 and December 31, 2014 consists of:

	\$
Surplus related to stock compensation, warrants and options associated with common shares	8,030,295
Surplus relating to warrants associated with previously issued preferred shares	1,874,209
	<u>9,904,504</u>

4 Related party transactions and balances

The Officers and Directors of the Company are also employees of Deans Knight Capital Management Ltd. ("Deans Knight"), the Company's investment advisor and manager. These Officers and Directors are not paid by the Company. Deans Knight provides administration, financial reporting and other ancillary services required by a public company, as well as investment management services related to the remaining investments, all as more particularly set forth in the Services Agreement between the Company and Deans Knight dated May 20, 2014 and available for review on SEDAR. Deans Knight is paid a nominal fee of \$10 per month plus G.S.T. for the services it provides to the Company under the Services Agreement. Prior to May 20, 2014, and for the period from January 1, 2014 to April 30, 2014, Deans Knight was paid a management fee computed quarterly, at an annual rate of 1.5% of the net asset value plus applicable taxes, and adjusted for certain non-investment related assets.

For the year ended December 31, 2015, management fees totalled \$126 (2014 - \$554,785). At December 31, 2015, \$189 (December 31, 2014 - \$63) was owed to Deans Knight, which was unsecured and included in accounts payable and accrued liabilities in the statements of financial position, and is payable immediately.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

5 Net realized gain (loss) on investments sold and foreign currency contracts

The net realized gain (loss) on investments sold and foreign currency contracts for the year ended December 31 was as follows:

	2015 \$	2014 \$
Proceeds from sale of investments	2,688,391	61,878,978
Investments at cost – Beginning of year	2,513,316	68,222,974
Add: Cost of investments purchased	-	66,382
	2,513,316	68,289,356
Less: Investments at cost – End of year	2,104,497	2,513,316
Cost of investments sold	408,819	65,776,040
Net realized gain (loss) on investments sold and foreign currency contracts	2,279,572	(3,897,062)

Net realized gain (loss) on investments sold and foreign currency contracts consists of:

	2015 \$	2014 \$
Net realized gain (loss) on investments sold	2,279,572	(3,446,354)
Net realized loss on foreign currency contracts	-	(450,708)
	2,279,572	(3,897,062)

6 Taxation

Uncertainty of deductibility of tax losses

Prior to the reorganization and change in the Company's business that occurred in 2008, as discussed in note 1, the Company had generated significant tax losses and other tax attributes as a result of its prior business activities. In its tax filings since the reorganization, the Company has taken the position that these losses and other tax attributes could be used to offset taxable income generated by the Company, thereby reducing its taxes payable.

In July 2014, the Company received Notices of Reassessment ("NORAs") from the CRA for the taxation years 2009 to 2012, inclusive. In the NORAs, the CRA denied the use of the losses and other tax attributes by the Company on the basis that an acquisition of control of the Company occurred, as a result of the 2008 reorganization, and on the basis of the General Anti-Avoidance Rule in the Income Tax Act (Canada) (the "CRA

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Matter"). The Company, in consultation with its legal advisors, remains of the view that its tax filing position is appropriate, and intends to vigorously defend its position.

The NORAs indicate that the Company's tax liability for the 2009 to 2012 taxation years is approximately \$22.7 million or \$2.15 per share ("Disputed Amount"), including arrears interest and penalties. Given the Company's financial results for 2013, 2014 and 2015, the Company estimates its overall potential net tax liability ("Potential Tax Liability") for the years 2009 through 2015 inclusive to be, as of the date hereof, approximately \$21.5 million, or \$2.04 per common voting share and per common non-voting share (collectively, the "Common Shares"). The Company prepaid \$21.6 million to the CRA in 2014, which was equal to the Potential Tax Liability at that time, to limit any future interest from being incurred. The Company intends to reassess its Potential Tax Liability at regular intervals and prepay any additional amount, if necessary, to limit any future interest from being incurred.

Should the Company be successful in defending its tax filing position, the amount prepaid to the CRA will be refunded to the Company with interest. However, if the Company is unsuccessful, the recorded amount of the deferred tax assets, if any, as well as such amounts claimed to date would be recorded as a charge to income, and the Potential Tax Liability would be forfeited to the CRA.

In late 2014, the Company filed its Notice of Appeal to the Tax Court of Canada, appealing the NORAs and is now attending to normal pre-trial processes, including discovery of documents and examinations for discovery with the Crown. The Company anticipates that legal proceedings through the Tax Court of Canada to resolve the CRA Matter will take considerable time.

Deferred tax asset

The tax effects of temporary differences and tax credits that give rise to significant components of the deferred income tax assets, at the statutory enacted rates when such benefits are expected to be realized, are as follows:

	Research and development expenses	Issuance costs	Total
	\$	\$	\$
At January 1, 2014	180,000	-	180,000
Charged to the statement of comprehensive loss	(180,000)	-	(180,000)
At December 31, 2014 and 2015	<u>-</u>	<u>-</u>	<u>-</u>

The tax balances and income tax expense recognized by the Company are based on management's interpretation of the tax laws. Due to the complexity inherent in tax interpretations, regulations and legislation, and changes in the operations of the Company, there are significant estimates required to compute income tax balances. It is possible that some or all of the Company's significant components of the deferred income tax assets may not be deductible for tax purposes and, accordingly, the amount of future income taxes and provision for income taxes recorded in the financial statements could change by a material amount.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Deferred income tax assets are recognized only to the extent that it is probable that future taxable income will be available against which temporary differences can be utilized.

In determining the amount of future income tax assets recognized, management assessed the projected taxable income of the Company. Inherent in all forward looking information is uncertainty and actual amounts could differ from these estimates and the difference could be material. In developing the projection, management has assumed full payment of all contractual interest and that investments will be sold at their current value.

Tax pools available to offset future tax expense and payable

As at December 31, 2015, the Company has accumulated non-capital losses of approximately \$4.4 million. The benefit of these losses has been recorded as a reduction of the prepaid tax asset. If the Company is successful in defending its tax filing position, these losses would be reinstated for carry forward and will expire in 2033. In addition, the Company has scientific research and experimental development (“SR&ED”) expenditures of \$18.1 million, which do not expire, available to offset future taxable income and \$7.1 million of unclaimed federal investment tax credits (“ITCs”), which expire from 2018 to 2025, available to offset future taxes payable. The benefit of the SR&ED expenditures and ITCs has not been recognized in the financial statements based on management’s assessment that it is not probable that these tax attributes will be realized in the future.

Reconciliation of income tax expense

The reconciliation of income tax computed at the statutory tax rate to income tax expense at December 31, using a 26.00% statutory tax rate (2014 – 26.00%), is as follows:

	2015	2014
	\$	\$
Comprehensive loss before tax	(553,845)	(20,423)
Statutory tax rate	26.00%	26.00%
Income tax recovery at statutory rates	<u>(144,000)</u>	<u>(5,310)</u>
Non-capital loss carry forward	144,000	5,310
Reduction of deferred tax asset	-	<u>180,000</u>
Provision for deferred income tax	<u>-</u>	<u>180,000</u>

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

7 Financial instruments

The following table presents the carrying amounts of the Company's financial instruments by category as at December 31, 2015:

Financial instruments by category	Amortized cost	Assets/liabilities	Total
	\$	at FVTPL	\$
		\$	
Assets as per statements of financial position			
Designated as FVTPL:			
Investments	-	282,020	282,020
Loans and receivables:			
Cash and accrued interest receivable	1,924,070	-	1,924,070
	<u>1,924,070</u>	<u>282,020</u>	<u>2,206,090</u>
Liabilities as per statements of financial position			
Other financial liabilities:

Fair value measurement

Financial instruments are classified in a hierarchy that prioritizes the inputs to fair value measurement. Each level is based on the transparency of the inputs used to measure the fair values of assets and liabilities. The three levels of the fair value hierarchy are:

Level 1 – inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – inputs that reflect other than quoted prices that are observable for the assets or liabilities either directly or indirectly;

Level 3 – inputs that are not based on observable market data.

If inputs of different levels are used to measure an asset's or liability's fair value, the classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement. The following tables illustrate the classification of the Company's financial instruments within the fair value hierarchy:

Financial assets at fair value – December 31, 2015

	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Corporate debt	-	-	78,026	78,026
Equities	-	-	203,994	203,994
Royalty	-	-	-	-
	<u>-</u>	<u>-</u>	<u>282,020</u>	<u>282,020</u>

Financial assets at fair value – December 31, 2014

	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Corporate debt	-	-	1,588,228	1,588,228
Equities	-	556,145	-	556,145
Royalty	-	-	1,122,481	1,122,481
	<u>-</u>	<u>556,145</u>	<u>2,710,709</u>	<u>3,266,854</u>

There were no transfers between Level 1 and Level 2 of the fair value hierarchy in either 2015 or 2014.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

The following tables reconcile the Company's recurring Level 3 fair value measurements:

	Corporate debt \$	Equities \$	Royalty \$	Total \$
Balance – January 1, 2014	6,334,859	106,629	1,241,233	7,682,721
Transfers out	(813,143)	-	-	(813,143)
Sales	(4,000,000)	(264,473)	-	(4,264,473)
Realized and unrealized appreciation (depreciation)	66,512	157,844	(118,752)	105,604
Balance – December 31, 2014	<u>1,588,228</u>	<u>-</u>	<u>1,122,481</u>	<u>2,710,709</u>
Unrealized appreciation (depreciation)	<u>66,511</u>	<u>-</u>	<u>(118,751)</u>	<u>(52,240)</u>
Balance – January 1, 2015	1,588,228	-	1,122,481	2,710,709
Transfers in	-	1,595,438	-	1,595,438
Sales	-	-	(2,186,304)	(2,186,304)
Realized and unrealized appreciation (depreciation)	(1,510,202)	(1,391,444)	1,063,823	(1,837,823)
Balance – December 31, 2015	<u>78,026</u>	<u>203,994</u>	<u>-</u>	<u>282,020</u>
Unrealized depreciation	<u>(1,510,202)</u>	<u>(1,391,444)</u>	<u>-</u>	<u>(2,901,646)</u>

The transfer from Level 3 to Level 2 during the period ended December 31, 2014, totalling \$813,143, related to corporate debt securities that were exchanged for common shares traded in an active market, as part of a corporate restructuring.

The transfer from Level 2 to Level 3 during the year ended December 31, 2015, totalling \$1,595,438, related to equities that have ceased trading in an active market during the year ended December 31, 2015.

Level 3 fair value measurements have predominantly been valued by considering data inputs such as the last price the security was traded at, most recent bid/ask information, prices of similar securities with available prices, and comparison of yields of comparable investments. Any reasonably possible alternative assumptions, except as noted below, would result in immaterial changes to total net assets.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Management of financial risks

In the normal course of business, the Company is exposed to various financial risks, including credit risk, liquidity risk and market risk (consisting of interest rate risk, currency risk and other price risk). The Company's overall risk management program seeks to minimize potentially adverse effects of these risks on the Company's financial performance by employing a professional, experienced portfolio advisor, monitoring daily the Company's positions and market events, diversifying the investment portfolio within the constraints of the investment guidelines and periodically using derivatives to hedge certain risk exposures. Further, the Company monitors the portfolio to ensure compliance with its investment strategy, investment guidelines and securities regulations.

Fair value risk

The Company's investments are exposed to market price risk and this risk affects the fair value of the investments. All investments have an inherent risk of loss of capital. The maximum risk resulting from investments is determined by their fair value. The Company seeks to manage valuation risks by regular ongoing monitoring of the investment performance of the individual investee companies. A 10% change in the value of the Company's equity investments would have a \$20,399 (December 31, 2014 - \$55,615) impact on profit or loss.

Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company.

All transactions executed by the Company in listed securities are settled/paid for upon delivery using approved brokers. The risk of this settlement not occurring is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. Since the Company invests primarily in high-yield debt instruments and derivatives, this represents the main concentration of credit risk. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The maximum credit exposure of these assets is represented by their carrying amounts. However, this maximum exposure is mitigated to varying degrees in each investment, based on the collateral held, if any. Collateral may include such things as a general security agreement over all assets, or specific security over specific assets. It may also entitle the debt holder to take over the overall business through restructuring of the investment.

At December 31, 2015 and December 31, 2014, all remaining investments held by the Company were unrated by the various credit rating agencies. The Company's credit risk exposure by sector at December 31, 2015 is limited to investments valued at 0.3% of net assets (December 31, 2014 - 5.6%), which are in the service sector.

Credit risk associated with the Company's cash and cash equivalents is not considered significant, as they are held with Tier 1 Canadian financial institutions.

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or fair values of financial instruments.

The Company's investments include interest-bearing financial instruments. Accordingly, the Company is exposed to the risk that the value of such financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. The table below summarizes the Company's exposure to interest rate risk by term to maturity on its investments:

	Fair value	
	December 31, 2015 \$	December 31, 2014 \$
Maturity		
Less than 1 year	78,076	1,119,709
1 – 3 years	-	-
3 – 5 years	-	373,075
Greater than 5 years	-	1,217,925
	<u>78,076</u>	<u>2,710,709</u>

As at December 31, 2015, if the prevailing interest rates had been raised or lowered by 1%, assuming a parallel shift in the yield curve, with all other factors remaining constant, net assets could possibly have decreased or increased by approximately \$618 or 0% of net assets (December 31, 2014 - approximately \$104,000 or 0.5% of net assets).

Liquidity risk

As the Company is a closed-end investment company with a fixed number of common shares outstanding, unlike an open-ended mutual fund, it is not exposed to the liquidity risk associated with daily cash redemptions of securities.

The Company's remaining investments may not be able to be liquidated quickly at an amount close to their fair value to respond to specific events such as deterioration in the creditworthiness of any particular issuer. Investments held by the Company may be subject to resale restrictions such as hold periods. The resulting values for the Company's remaining investments may differ from values that would be realized if a ready market exists.

The Company reviews its investment portfolio to assess liquidity risk on its holdings.

Deans Knight Income Corporation

Notes to Financial Statements
December 31, 2015 and 2014

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company's remaining investments include securities that are denominated in a currency other than the Canadian dollar, which represents the functional currency of the Company. Consequently, the Company is exposed to currency risk as the value of the portfolio securities denominated in currencies other than the Canadian dollar will vary due to changes in foreign currency exchange rates.

Prior to April 30, 2014, being the date the Company returned \$102,738,314 of capital to its shareholders (note 3), the Company entered into foreign currency contracts with financial institutions to hedge the value of foreign currency denominated investments. The fair value of these contracts was reflected in investments. Gains or losses arising from these contracts offset the gains or losses from translation of the underlying investments. The unrealized gains or losses were reflected in unrealized appreciation/depreciation on foreign currency contracts on the statements of comprehensive loss. The potential impact to net assets of a 5% change in foreign currency rates against the Canadian dollar, assuming all other variables remain constant, would be \$14,000 at December 31, 2015 (December 31, 2014 - \$145,000).

8 Capital management

The capital of the Company is divided into voting and non-voting common shares, each having an unlimited authorized amount. The number of voting and non-voting shares outstanding, and changes thereto, are outlined in note 3. On April 30, 2014, the Company paid a return of capital of \$102,738,314 to voting and non-voting common shareholders, equal to \$9.75 per share.

The Company manages its capital in accordance with the Company's amended business objectives, as approved by shareholders at a meeting held in April 2014. The objectives include: (i) divesting of any remaining investments held; (ii) attending to, and if necessary, litigating, the CRA audit and related tax appeal (note 6); and (iii) attending to any distributions to shareholders of surplus cash and the eventual wind-up and termination of the Company thereafter.

The Company discontinued its monthly dividend payment of \$0.0583 per voting and non-voting common share after its December 2013 payment. However, the Company intends to pay cash dividends to shareholders as any remaining investments are liquidated, resulting in surplus cash in the Company. On October 15, 2015, the Company declared a cash dividend of \$0.20 per share.

9 Critical accounting estimates and judgments

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgments and estimates that the Company has made in preparing the financial statements:

Fair value measurement of derivatives and securities not quoted in an active market

The Company holds financial instruments that are not quoted in active markets. Fair values of such instruments are determined using valuation techniques and may be determined using reputable pricing sources (such as

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

pricing agencies) or indicative prices from market makers. Broker quotes, as obtained from the pricing sources, may be indicative and not executable or binding. Where no market data is available, the Company may value positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Company to make estimates. Changes in assumptions about these factors could affect the reported fair values of financial instruments. The Company considers observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Refer to note 2 for further information about the fair value measurement of the Company's financial instruments and to note 7 for further information about Level 3 investments.

Deferred income taxes

The tax balances and income tax expense recognized by the Company are based on management's interpretation of the tax laws. Due to the complexity inherent in tax interpretations, regulations and legislation, there are significant estimates required to compute income tax balances. It is possible that some or all of the Company's significant components of the deferred income tax assets may not be deductible for tax purposes and, accordingly, the amount of the prepaid tax assets, deferred income taxes, and provision for income taxes recorded in the financial statements could change by a material amount (note 6).

In determining the amount of deferred income tax assets recognized, management assessed the projected taxable income of the Company. Inherent in all forward looking information is uncertainty and actual amounts could differ from these estimates and the difference could be material. In developing the projection, management has assumed full payment of all contractual interest and that investments will be sold at their current value.

10 Future accounting changes

At December 31, 2015, a number of standards and interpretations, and amendments thereto, had been issued by the International Accounting Standards Board ("IASB"), which are not effective for these financial statements. Those which are expected to have an effect on the Company's financial statements are discussed below:

IFRS 9 '*Financial instruments*' addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 establishes three primary measurement categories for financial assets: amortized cost, fair value through other comprehensive income and FVTPL. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at FVTPL with the irrevocable option to recognize changes in fair value with no recycling of gains or loss to the statements of comprehensive loss. IFRS 9 requires credit losses to be recognized on an expected loss basis rather than using an incurred loss model. For financial liabilities, there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. The standard is effective for accounting periods beginning on or after January 1 2018. Early adoption is permitted. The Company is assessing the impact of IFRS 9.

IFRS 15 '*Revenue from contracts with customers*' deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of

Deans Knight Income Corporation

Notes to Financial Statements

December 31, 2015 and 2014

revenue and cash flows arising from an entity's contracts with customers. Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 '*Revenue*' and IAS 11 '*Construction contracts*' and related interpretations. The standard is effective for annual periods beginning on or after January 1 2018 and earlier application is permitted. The Company is assessing the impact of IFRS 15.
